

# VSEVOLOD ANDRUSHCHENKO

Frontend Engineer

## DETAILS

Bangkok, Thailand  
[vsed777@gmail.com](mailto:vsed777@gmail.com)  
+6620361251

## PROFILE

I am a Frontend Developer with more than 5 years of experience. Worked in Conde Nast, Alfa Bank, and others. I'm strong team player, who want to improve the product and always have ideas about how to do it.

## EMPLOYMENT HISTORY

### Senior Frontend Developer, Chestny Znak

AUGUST 2022 – AUGUST 2023

Worked on the development of a project for labeling goods for participants of the trade turnover, which allows inputting product data into the system. This includes portal development, bug fixing, redesign, and development and implementation of new eslint rules.

Tech stack: react, redux-saga, material ui

### Senior Frontend Developer, Alfa-Bank

OCTOBER 2020 – MAY 2022

Worked in the small business lending development department, where my task was to implement new solutions with the team to help the bank operate on a larger scale and more efficiently. One of the projects I worked on was a credit calculator.

In addition to supporting the calculator, the next project was a pre-scoring service for potential small business credit consumers. These projects successfully increased conversion rates and consequently the number of bank clients among small businesses. It also allowed the bank to launch more extensive advertising campaigns for this direction due to high conversion rates. Tech stack: React, TypeScript, Jest.

### Frontend Developer, Conde Nast

APRIL 2019 – SEPTEMBER 2020

1. Development and enhancement of the Curiosity project, a service for creating surveys for websites and internal purposes (HR, etc). It consists of two parts - an admin panel and a widget, which are separate projects. Both projects use React, Redux, Redux-Saga, React-jsonschema-form, React-Modal, and React-Beautiful-DnD. 80% frontend was developed by me. Also, I implemented tests using jest and puppeteer.
2. Development of Consent-lib, which is a banner that collects user consent for data collection. It has complex logic for displaying and caching data, and supports different types and versions of policies. It can be implemented on any company website or integrated into any application.

### Frontend Developer, Delta Solutions

AUGUST 2018 – MARCH 2019

1. Developed the frontend for the BeeCloud service cost calculation page independently in the first month of work, using Beeline UI guidelines for UI design. Technology stack: React, Typescript, MobX, Formik, Axios, beeline-ui-toolkit.
2. Developed an admin panel template for internal Beeline projects. Technology stack: React, Typescript, MobX, Axios, Antd.
3. Developed a control panel for air conditioners in server rooms for MTS. Technology stack: React, Typescript, MobX, Axios, Antd.
4. Developed a monitoring page for requests in the Cloud Beeline back office. Technology stack: React, Typescript, MobX, Formik, Axios, react-table, beeline-ui-toolkit, styled components.
5. Supported existing company projects.

## Frontend, Self-Employed

AUGUST 2017 – JULY 2018

Worked with Wordpress sites, mostly HTML & CSS work. Also was some entry-level react projects at that point
